

# TYPE SCHEMES CONFORMITY ASSESSMENT

## CERTIFICATION - 9 schemes

### *for serial production (1c, 2c, 5c, 6c, 7c, 8c):*

**scheme 1c** - analysis of the production state of [certification body](#), with testing

**scheme 2c** - without analysis of the production state, if the manufacturer has the certified management system (quality, safety), with testing in [test laboratory](#)

**scheme 5c** - analysis of production state, with research of a product design

**scheme 6c** - without analysis of the production state, if the manufacturer has the certified management system (quality, safety), with research of a product design

**scheme 7c** - analysis of the production state, with research of type

**scheme 8c** - without analysis of the production state, if the manufacturer has the certified management system (quality, safety), with research of type

### *for party products (single product) (3c, 4c, 9c):*

**scheme 3c** - for production batch, with testing

**scheme 4c** - for a single product, with testing

**scheme 9c** - for a production lot of the limited amount supplied by the foreign manufacturer, or for sophisticated products, destined for equipping factories at the territory of the Customs Union, based on the analysis of the submitted documents

## DECLARATION OF CONFORMITY - 6 schemes

*the applicant is taking the declaration of conformity based on their own evidence:*

**scheme 1d** - for serial production, with carrying out the production control and testing by the manufacturer

**scheme 2d** - for a party of products, with testing in the laboratory at the choice of the applicant

*the applicant is taking the declaration of conformity based on their own evidence and evidence obtained with the participation of the certification body and (or) accredited testing laboratory:*

**scheme 3d** - for serial production, with carrying out the production control by the manufacturer and with testing in an accredited laboratory

**scheme 4d** - for party products (single product) with testing in an accredited laboratory

**scheme 5d** - for serial production, with carrying out the production control by the manufacturer and the research of product type accredited by [the certification body](#) and (or) [accredited laboratory](#)

**scheme 6d** - for serial production with testing in an accredited laboratory, if the manufacturer has the certified management system (quality, safety)

Technical regulations "On the safety of machinery and equipment"

TR CU 010/2011 provides for the following schemes of conformity:

- Certification of conformity - 1c, 3c, 9c
- Acceptance of the declaration on conformity - 1d, 2d, 3d, 4d, 5d, 6d

Technical Regulations "On safety devices operating on fuel gas"

TR CU 016/2011 provides for the following schemes of conformity:

- Certification of conformity - 1c, 3c, 4c
- Acceptance of the declaration on conformity - 1d, 2d, 3d, 4d

Technical Regulations "On the safety equipment of high pressure"

TR CU 032/2013 provides for the following schemes of conformity:

- Certification of conformity - 1c, 3c, 4c, 7c
- Acceptance of the declaration on conformity - 1d, 2d, 3d, 4d, 5d
